

Turnover among Early Educators

Ready Region Profile: Capital Area

Early educators have difficult jobs. They receive low wages and leave their jobs at high rates. This turnover can destabilize care for children, families, providers, and the economy. States rarely have large-scale data on turnover, especially in child care centers where turnover is often highest. Virginia’s LinkB5 data system provides a unique opportunity to track turnover at scale across sectors and regions.

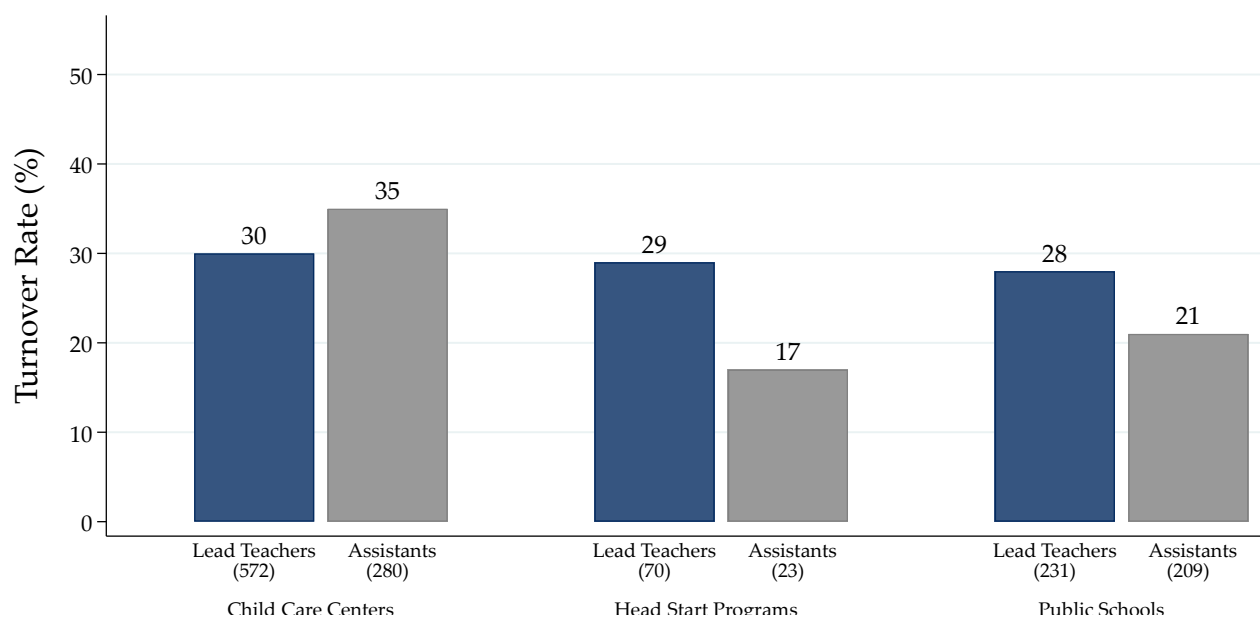

This profile showcases how LinkB5 tracks nearly 9,000 early educators employed in Virginia in Fall 2021 and assesses whether they remained at the same site a year later. Among these Virginia early educators are 1,385 from Ready Region Capital Area. Turnover rates were calculated based on the number of teachers who were registered in LinkB5 in Fall 2021 but not registered at their site later in Fall 2022. Statewide, 37% of the early educators in LinkB5 left their sites from Fall 2021 to Fall 2022. For Ready Region Capital Area, 29% of the early educators in LinkB5 left their sites during this time.

	Capital Area (Figure 1)		Virginia (Figure 2)	
Sample size (All sectors)	157 sites*	1,385 staff	1,192 sites**	8,820 staff

*58% of publicly funded sites in Ready Region Capital Area

**54% of publicly funded sites in Virginia¹

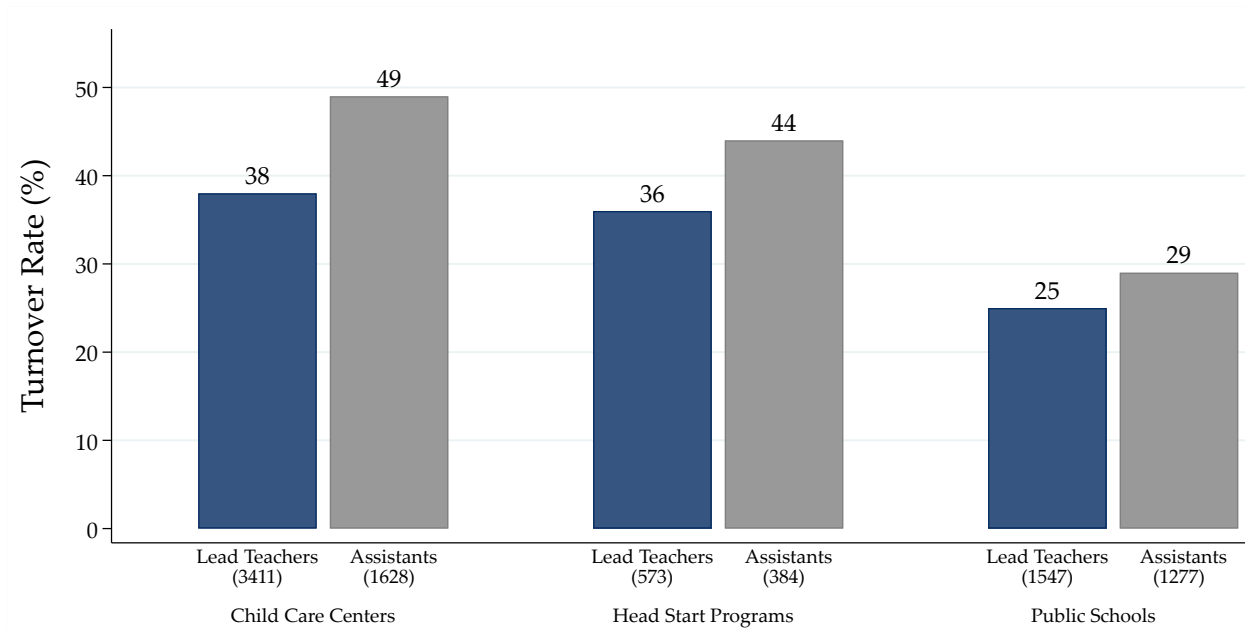

Figure 1. Early Childhood Teacher Turnover in Ready Region Capital Area by Sector and Role (Fall 2021-Fall 2022)

Note: Based on Fall 2021 and Fall 2022 LinkB5 registration data for teachers and assistants. The number of staff in our sample who were registered in each sector and role in Fall 2021 is shown in parentheses. The turnover rate is the percentage of those staff who were not registered as working at the same site in Fall 2022.

¹Both the Ready Region and statewide count includes publicly funded centers, Head Start programs, and schools but not family day homes.

Figure 2. Early Childhood Teacher Turnover Rates in Virginia by Sector and Role (Fall 2021-Fall 2022)

Note: Based on Fall 2021 and Fall 2022 LinkB5 registration data for teachers and assistants. The number of staff in our sample who were registered in each sector and role in Fall 2021 is shown in parentheses. The turnover rate is the percentage of those staff who were not registered as working at the same site in Fall 2022.

Key Takeaways

- **Both statewide and in Ready Region Capital Area, turnover rates are high.**
- **Turnover rates in Ready Region Capital Area are particularly high for child care early educators.**
- **Ready Region Capital Area early educators left their sites at lower rates than early educators statewide, except for public school lead teachers.**
- **Turnover rates for Head Start and public school lead teachers are higher than turnover rates for assistants in Ready Region Capital Area.**
