

Turnover among Early Educators

Ready Region Profile: Chesapeake Bay

Early educators have difficult jobs. They receive low wages and leave their jobs at high rates. This turnover can destabilize care for children, families, providers, and the economy. States rarely have large-scale data on turnover, especially in child care centers, where turnover is often highest. Virginia’s LinkB5 data system provides a unique opportunity to track turnover at scale across sectors and regions.

This profile showcases how LinkB5 tracks nearly 9,000 early educators employed in Virginia in Fall 2021, assesses whether they remained at the same site a year later. Among these Virginia early educators are 758 from Ready Region Chesapeake Bay. Turnover rates were calculated based on the number of teachers who were registered in LinkB5 in Fall 2021 but not registered at their site later in Fall 2022. Statewide, 37% of the early educators in LinkB5 left their sites from Fall 2021 to Fall 2022. In Ready Region Chesapeake Bay, 39% of the early educators in LinkB5 left their sites during this time.
