

# PDG B-5 2021 Family Survey: Ready Region 3 - Southside

## Community-Level Search Process Findings

*This profile summarizes community-level information from the 2021 PDG B-5 Family Survey to match the state-level takeaways presented at the Ready Regions, Mixed Delivery, & PDG TA Session on March 31, 2022. Due to small sample sizes in some PDG communities, results are presented by Ready Region.*

### Who took the survey?

In November 2021, families with children ages 0-5 but not yet in kindergarten at sites participating in the PDG were invited to take a short survey about their experiences finding and using care for their youngest child. In total, 3,909 families in Virginia completed the survey, including 337 families in Ready Region Southside, which includes the Central Virginia and Danville-Pittsylvania PDG communities. These findings reflect only the experiences of families who participated in the survey and may not accurately represent all families across the state or in this community.

| Household Characteristic |   | Southside Sample | Full PDG Sample |
|--------------------------|---|------------------|-----------------|
| Household Income         | Household under 150% of Federal Poverty Level (FPL)       | 15%              | 14%             |
|                          | Household between 150-300% of Federal Poverty Level (FPL) | 41%              | 45%             |
|                          | Household over 300% of Federal Poverty Level (FPL)        | 44%              | 41%             |
|                          | Primary household language not English                    | 3%               | 11%             |
| Care Type                | School-based program                                      | 57%              | 47%             |
|                          | Center-based program                                      | 31%              | 36%             |
|                          | Home-based program  | 10%              | 14%             |
|                          | Needs care during nontraditional hours                    | 31%              | 32%             |

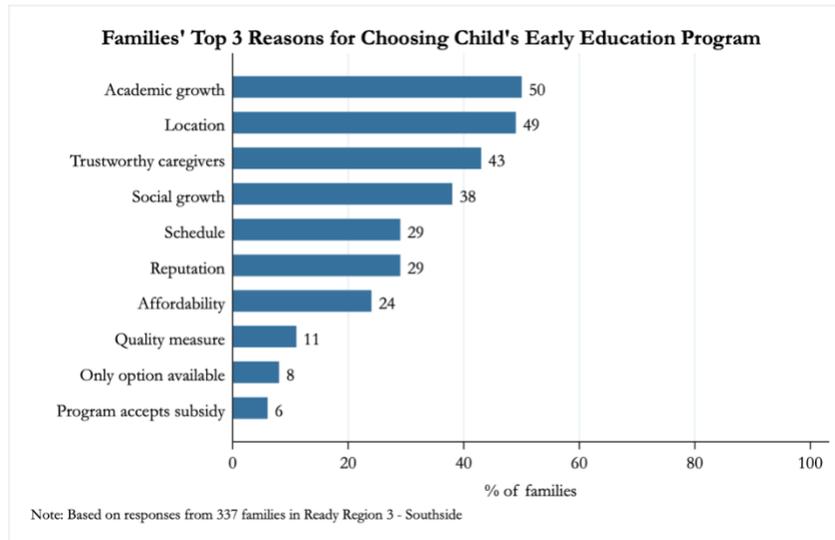

| Child Characteristic |                                       | Southside Sample | Full PDG Sample |
|----------------------|---------------------------------------|------------------|-----------------|
| Age                  | Age 2 and under                       | 24%              | 30%             |
|                      | 3 years old                           | 14%              | 21%             |
|                      | 4 or 5 years old, not in kindergarten | 62%              | 49%             |
| Special Needs        | Has IFSP or IEP                       | 12%              | 12%             |
|                      | Evaluated but not eligible            | 4%               | 10%             |
|                      | May need an evaluation                | 4%               | 5%              |
| Race/Ethnicity       | Black, non-Hispanic                   | 26%              | 22%             |
|                      | Hispanic                              | 5%               | 11%             |
|                      | White, non-Hispanic                   | 62%              | 57%             |
|                      | Other / multiracial                   | 6%               | 10%             |

Note: Household FPL group is estimated using household size and reported income range. Nontraditional hours are defined as needing care before 7 am or after 6 pm on weekdays, overnight care, and/or care on weekends. The survey asked families about the race/ethnicity of their children using the same approach as the Virginia Department of Education. It asked whether families identified their children as one or more race/ethnicity groups, including American Indian or Alaskan Native, Asian or other Pacific Islander, Black or African American, Hispanic, Native Hawaiian, White, or any other race/ethnicity. In the table above, we show the percentages for the largest race/ethnicity groups.

## Ready Region 3 - Southside

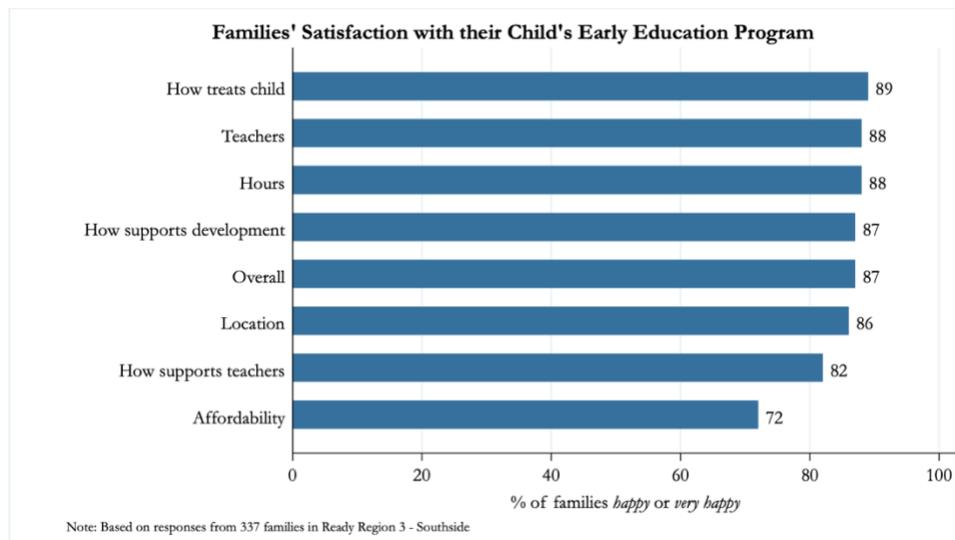

### Reasons for choosing early care & education programs

Families reported prioritizing both convenience and learning opportunities when choosing an early care and education program for their child. As shown in the graph below, families named academic growth, location, and trustworthy caregivers as the top reasons for choosing their child's program.

### Satisfaction with early care & education programs

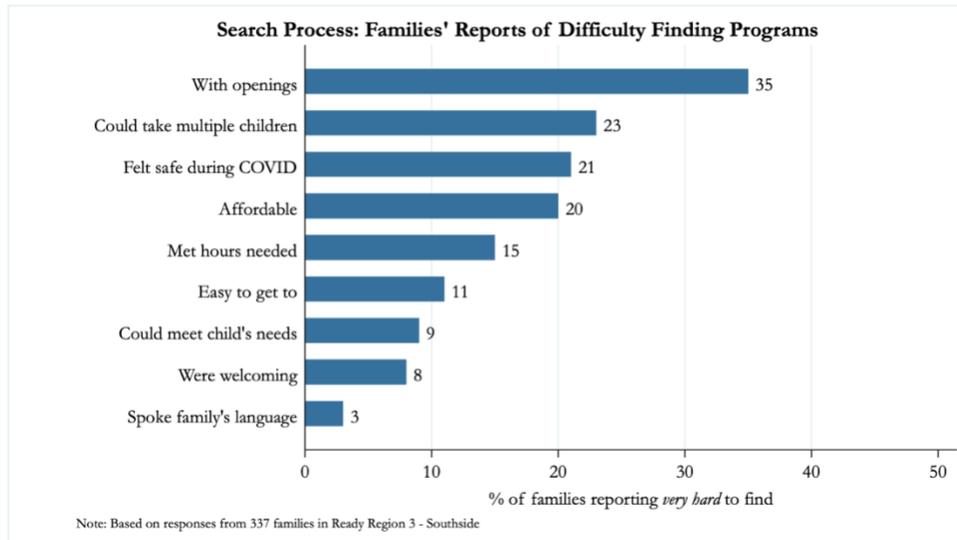

When asked about their satisfaction with their child's current early care and education program, most families reported that they are happy with key aspects, including how their child is treated, their child's caregivers/teachers, and the hours of care the program offers.

## Ready Region 3 - Southside

### Difficulty finding early care & education programs

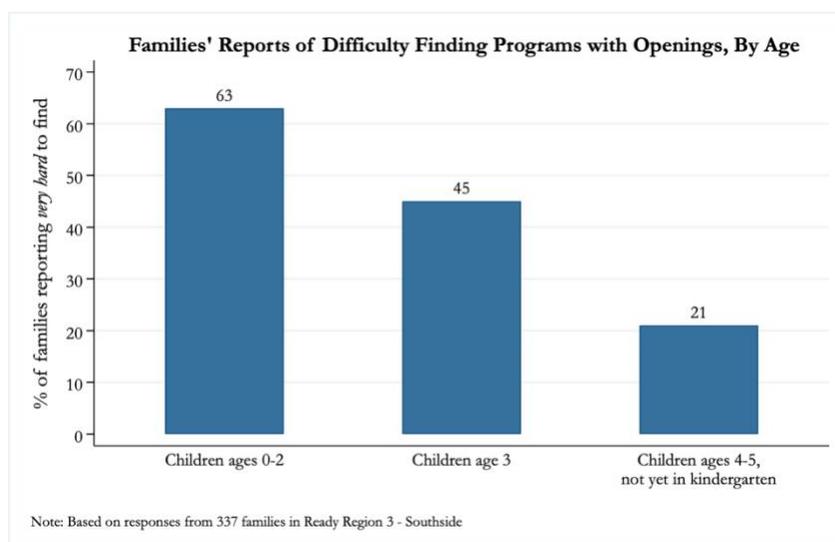

Despite satisfaction with key aspects of their child's program, many families reported that it was very hard to find programs that could meet their needs. As shown in the graph below, families marked that it was particularly hard to find programs that had openings, had space for more than one of their children, and felt safe during COVID.

### Challenges finding programs by subgroups

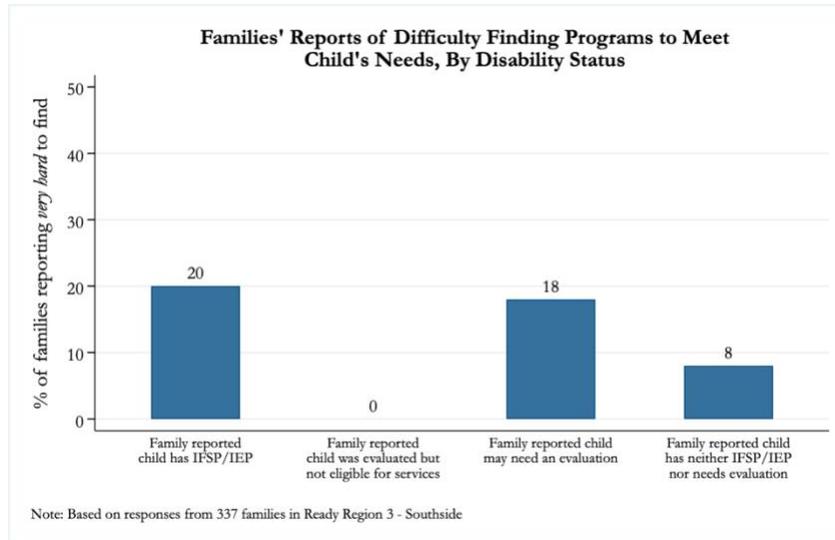

Challenges with finding programs differed by key family and child characteristics, including child's age, child's disability status, and the language the family speaks at home.

**Age.** Families with younger children were much more likely to report that it was very hard to find a program that had openings.

## Ready Region 3 - Southside

**Disability status.** Families who reported that their child had a diagnosed disability or that their child may need an evaluation were more likely to report that it was very hard to find a program that met their child's needs.

**Language.** Families who speak a language other than English at home were much more likely to report that it was very hard to find a program with staff who speak the family's primary language.
